Stop Eating So Much!

In an interview for the July American Magazine, an authority on the food question says:

"Stop asking a lot of guests to dinner every few days, and making an unnecessary and unwholesome show of a lot of food. Parties of this sort are going to come mighty close to disloyalty in the days ahead. The society woman who gives a tea or dinner to a couple of hundred guests is committing a national crime. There is no occasion on which it is necessary to entertain more than ten or a dozen persons. One can get all the wit and brilliance in that number that anyone needs."

"Don't just do these things yourself—create a public opinion against them. Preach and live the gospel of the clean plate. Everyone in America ought to be forced to eat everything on his table. In that event a good many of us would die of indigestion, and most of the rest would leave the world an altogether unnecessary amount of food is being cooked."

"The articles of food that Europe needs most are wheat, beans and pork. As much as possible, stop eating these. Use corn instead of wheat. There are plenty of substitutes for pork and beans and the other staples Europe is crying for."

Im going to prescribe Resinol for that eczema

"I might give you a formal prescription, but what's the use? It would cost you more than a jar of Resinol and I shouldn't be nearly as sure of the results. You see, I have been using Resinol Ointment for over twenty years. During that time I have tried out dozens of new ways of treating skin-troubles, but I have always come back to Resinol—I know that it stops itching at once, generally heals the eruption, and that it contains nothing which could irritate the skin. You can get a jar at any drug store."

"Speaking of Movies"—Irvin S. Cobb.

Irvin S. Cobb has written an article on the movies for the July Woman's Home Companion, in which he says:

"Many of the writers who went into the new field extensively were in the preliminary negotiations butchered to make a producer's holiday, and when they beheld, with horror-stricken eyes, the completed product upon the screen, they realized that, thanks to the scenario sharp, and the director and the east, nothing recognizable remained of the mishandled and mangled and mutilated children of their brain. Finally, in any number of cases, came the ungenial and unpleasant and expensive task of endeavoring to induce, or to force, the producing company to make proper adjustments at proper intervals. Mind you, I am not saying that the fault for poor presentation of authors' notions was always to be put upon the producers. Some writers appeared to suffer from the delusion that almost any idea was good enough for the film; that neither thought nor work was required of them in order to produce theme and continuity. But, on the other hand, writers who went into the game seriously and with high ideals, with an honest desire to build praiseworthy stories suitable for moving picture presentation, have suffered most grievously by reason of incompetence in the studio as well as by double dealings and shiftness in the bookkeeping departments and in the executive offices."

A large number assembled at the summer home of Hon. and Mrs. Alexander Dunnett at Ricker's, the Fourth, in response to a general invitation issued a week previous to the public to spend the day at their pleasant grounds. People came from many adjoining towns, bringing lunches, and enjoying a picnic dinner, the Dunnetts furnishing hot coffee. After the dinner hour able addresses were given by Judge Frank L. Fish of Vergennes, Rev. George A. Martin of St. Johnsbury, and Dr. John M. Thomas, president of Middlebury college. The speeches were all more or less along patriotic lines, and were much enjoyed by all present.

The hospitality of Mr. and Mrs. Dunnett was greatly appreciated and all who availed themselves of the privilege to attend, feel they were furnished a rare treat. As the afternoon waned many went indoors to inspect the commodious rooms that Esq. Dunnett has made so comfortable and cozy, especially the large room which he has fitted up and which contains the landscape frieze, the work of Mrs. Dunnett's son. This is continuous around the room, and is of rare beauty, which words fail to describe.
